The scope of the work is to build a ramp on the rear porch. The ramp from the porch will go 16 feet to a 5 foot X 5 foot deck . The ramp will then make a 90 degree turn and fall to the driveway. The last 5 or 6 Foot will be concrete. The frame work off the ramp will be of pressure treated wood. The deck will be of composite material. The ramp will be 5 foot in width and about 33 Foot in length. The cost of the ramp will be ~~\$3350.00~~ *\$4450.00* to include labor and material. Does not include permit if required.

Thank-you Robert Weaver

Ramp 3350.00
 Rail 1100.00
 Total 4450.00
