Hi Bob

The ramp by the pool will be \$8600.00. This is all labor and material but does not include a permit if needed. It will attach to the building on one side with no rail the other side will be like the rear ramp with the same rail and cable layout. The rear deck will be \$4400. and will have the same rail as the ramp on the driveway side. this is for the deck run to just shy of the door with a transition to it.

thank-you Robert Weaver
